

RECYC-FRIGO ENVIRONMENT PROGRAM LAUNCH:

The Municipality of Bristol joins the RECYC-FRIGO program and asks the public to recycle their old appliances

March 2008—The Municipality of Bristol is proud to announce its support for the RECYC-FRIGO *Environment* program to collect old energy-inefficient refrigerators and freezers. Refrigerators and freezers ten years old and older are known to be ravenous electricity consumers.

RECYC-FRIGO offers free home pickup of your fridge or freezer as long as it's 10 year old or older, in working condition, connected, and between 10 and 25 cubic feet in size. If your appliances match this description, just make an appointment by dialing 1-877-49FRIGO (1-877-493-7446) or by filling out the collection form online at www.recyc-frigo.com. A collection truck will come to your home to pick up your appliance free of charge.

SUGGESTED QUOTE FROM THE MAYOR:

"Our community's participation in this program is important not just so we can save energy, but because it's a simple way to deal with heavy appliances that are sometimes hard to get rid of," said Mayor Wilson. "It's no walk in the park getting an old fridge out of the basement, I know! That's why I encourage you to take advantage of this simple and convenient solution."

RECYC-FRIGO, a concrete action that pays!

Participants will receive a cheque for \$60 for each appliance collected (up to a maximum of two per household) within three weeks of the date your refrigerator or freezer is picked up. And as well as saving electricity, the RECYC-FRIGO program addresses another major environmental problem by recycling 95% of the materials in the appliances we collect.

Taking part in the RECYC-FRIGO program means saving energy and doing your part for the environment. For further information on the program, visit www.recyc-frigo.com.
